WORK EXPERIENCE

full stack 03020233
transcom

- Developed and shipped multiple features across React.js/Next.js and Node.js applications, collaborating with cross functional teams to deliver production-ready code.
- Built and maintained RESTful APIs across microservices; optimized PostgreSQL queries to improve backend performance.
- Integrated payment gateways (Stripe, Razorpay, PayPal); managed AWS deployments via CI/CD pipelines for faster, more reliable releases.
- Built Gen AI-powered features using OpenAI LLM APIs and prompt engineering within existing product workflows.

PROJECTS

tesi <https://github.com/pattjoshi>
Tech Stack: ai ,ml

- Built a chatbot answering natural-language questions over documents using RAG.
- Used LangChain for orchestration, OpenAI API for generation, and a vector database for semantic search; exposed via REST API to a React.js frontend.
